Angular 13+, React.js, Vue.js, TypeScript, JavaScript, HTML5, CSS3, RxJS, PrimeNG, Responsive Design, Storybook

Database

MySQL, PostgreSQL, Redis

APIs

Fincode, Fullstar, RESTFUL APIs

Methodologies

Agile, Scrum, Code Review, Git

Back-End

PHP, Ruby, Java Spring Boot

Cloud & DevOps

AWS, CDN Integration

AI & Tools

Claude Code, ChatGPT, Gemini, MCP Module Development, Adobe Express API, Devin

PROFESSIONAL EXPERIENCE

Full Stack Developer, *Peraichi Vietnam* 02/2025 – Present
Da Nang, Vietnam

Description: A web platform enabling users to create online seller websites with product management, payments, and e-commerce capabilities.

Responsibilities:

- Analyzed user requirements, investigate issue and defind solutions for CRM system development, improving seller workflow efficiency
- Built AI-powered landing page generator using Claude Code and Gemini, enabling users to auto-create professional pages in minutes
- Developed MCP (Model Context Protocol) modules to extend AI service capabilities across the platform
- Integrated third-party APIs including Fincode (payments), Adobe Express (design), Fullstar (onboarding), and CDN services
- Investigated and resolved production caching issues by implementing CDN strategies and optimizing browser cache behavior
- Collaborated with cross-functional teams using Agile/Scrum to maintain and improve platform reliability

Tech Stack: PHP, Vue.js, Ruby, Redis, AWS, Claude Code, Gemini

Frontend Developer, *AIHELLO*

08/2022 – 11/2024

Description: A SaaS platform helping Amazon sellers manage products, campaigns, pricing, and advertising across their listings.

Responsibilities:

- Lead a front-end team of 2 developers – conducted code reviews, managed tasks, and assigned tickets to ensure delivery quality
- Acted as solution architect, designing scalable and maintainable application structures for long-term platform growth
- Integrated Amazon Seller API to connect sellers with the platform, enabling real-time product and sales data synchronization
- Built key features including SmartView, Repricing engine, Campaign Creator, Budget management, and Targeting modules
- Developed subscription page for sellers with price analysis, sales tracking, and ad management dashboards
- Translated complex business requirements into technical specifications through direct client communication
- Proposed feature enhancements and system improvements that increased platform usability and scalability
- Collaborated closely with back-end team to resolve cross-stack issues and improve overall system performance

Tech Stack: Angular 13+, RxJS, PrimeNG, TypeScript

Frontend developer, *Trudi AI*

12/2024 – 01/2025

Da Nang, Vietnam

Description: A website to connect renters with homeowners.

Responsibilities:

- Implemented requested features and functionality.
- Create core module and story book for project
- Provided support to internship partners.

Key Features Developed: - Core internal components, - Storybook integration, - AI-powered voice response system

Tech Stack: Angular 13

Frontend developer Intern, *MGM technology company*

Description: Easy Reporting - A website that allows users to report office issues.

Responsibilities:

- Collaborating with the BE team to create the database.
- Collaborating with the FE team to develop and implement the website UI.

Key Features Developed:

- Integrate and create a database for the website.
- Report machinery or equipment malfunction.

Tech Stack: ReactJs, Java spring boost, Mysql

COURSES

Claude Code in Action, *Anthropic*

02/2026

KEY ACHIEVEMENTS

- Resolved critical production caching issues by implementing CDN optimization and browser cache strategies at Peraichi
- Grew from individual contributor to team lead and solution architect within 2 years at AIHello
- Successfully integrated multiple complex third-party APIs (Amazon Seller, Fincode, Adobe Express) into production systems
- Built AI-powered features (landing page generator, MCP modules) ahead of industry adoption curve
